Homework 8

April 19, 2012

This homework is also based on our discussions of Dynamic Programming. (I said I would combine homeworks 8 and 9, but changed my mind. There will be another homework on NP-completeness.)

1. Exercise 9 of Chapter 6
2. Exercise 16 of Chapter 6

The homework is due Wednesday, April 25, in class; if you can't make it to class on that day, just make sure you get it to me by that time.
